

DRIVING CHANGE: New Strategies, Skills and Perspectives for the Change Agent

Join us for a four-day comprehensive change leadership workshop.

Make sure the projects and initiatives you lead within your business or organization come in on time, within budget and deliver expected outcomes. If you want to develop or improve your change leadership skills, this workshop will:

- Increase your ability to work with all aspects of the change process
- Introduce you to the most effective strategies and latest thinking about change
- Provide opportunities to test and improve your new skills in workshop experiences, as well as in your workplace

Ultimately, you'll develop or improve your ability to ensure success for any project or initiative — now or in the future.

This four-day workshop is facilitated by the experienced consultants at Dialogs for Change® and is offered in two two-day sessions with a practice period (a 4-6 week break) built into the program. Participants return to the second session having tested their new skills in their real-life environment and come back ready to share best practices and work through unresolved challenges.

See below for open-enrollment workshop dates and locations, or contact us to learn about customized workshops for work-site delivery.

Topics covered during the workshop include:

- Clarifying the role of a change agent
- Managing complex situations
- Planning for change
- Securing project success in your own organization
- Managing "human dimension" challenges
- Change, communication and pedagogical processes
- Learning as a tool for success
- Personal improvement as a change agent
